Business**

## **PRESS RELEASE**

**Date February 26, 2008**

**For Immediate Release**

### **QuickSilver Analytics, Inc. Introduces Several Updates to Our CBRE Sampling Kits for 2008**

QuickSilver Analytics, Inc has recently made updates and changes to their evidence quality CBRE Sampling Kits including the QSA 102, QSA 600TC and the QSA 800HC. QuickSilver continually strives to include the best available and technologically advanced products in their Sampling Kits while still providing the only sampling kits on the market that contain chemical sampling tools that are cleaned or screened for over 10 chemical warfare-related compounds and a representative list of semi-volatile compounds (TICS/TIMS).

The Sampling Kits have been updated to include more sample jars and vials to now allow for obtaining nine chemical samples and nine biological samples, compared to the previous six of each chemical and biological samples.

QuickSilver has replaced three of the 60 mL syringes in the liquid module with three 30 mL syringes to allow for smaller volume samples to be taken more easily.

There are now thirty chain-of-custody forms in each Sampling Kit to accommodate the extra samples that can now be taken.

A disposable, water-proof camera with flash is included with each kit to allow for photographic evidence in any weather condition. There is also a photographic scale included in each kit.

The compass has been deleted from the Sampling Kits since most samplers now have GPS devices. The sample labels are now updated with a space to record GPS coordinates.

The flashlight has been replaced with a Pelican flashlight that is water resistant and has a lifetime guarantee.

The bleach packs in the Sampling Kits have been replaced with Reactive Skin Decontamination Lotion packets, now that they are available again, for chemical decontamination and germicidal wipes that have twice the shelf life of bleach packs will be used for biological decontamination.

Contact Amy Groth or Chris Johnson for more information on the CBRE Sampling Kits at 1-877-725-7587 or visit our website at [www.qckslvr.com](http://www.qckslvr.com).
